

AJIT BAPURAO NIKAM

Senior Java Developer | Team Lead | Microservices | Banking & Payments Technology

Pune, Maharashtra, India | Phone: 9422116422 | Email: ajitnikam23@gmail.com | LinkedIn: www.linkedin.com/in/ajitnikam1 | GitHub: github.com/AjitNikam

PROFESSIONAL SUMMARY

Senior Java Developer and Team Lead with 12+ years of experience designing, developing, and modernizing enterprise applications across banking, payments, credit reporting, ERP, and e-learning domains. Expert in Java 8/11/17/25, Spring Boot, Spring, Hibernate/JPA, REST APIs, Microservices, Kafka, and cloud-native delivery using AWS, PCF, and OpenShift. Proven track record leading legacy-to-microservices modernization, performance optimization, CI/CD enablement, test automation, and production support for clients including Discover Financial Services, Global Payments, and TransUnion. Strong client-facing communicator who translates complex business requirements into scalable, secure, and maintainable engineering solutions.

SKILLS MATRIX

Languages	Java 8/11/17/25, SQL, SOQL, JavaScript, HTML
Frameworks & Tools	Spring Boot, Spring, Hibernate/JPA, Spring Batch, Spring MVC, Spring JDBC, Apache Kafka, Jersey REST, JUnit, Mockito, PowerMockito, Serenity Cucumber, Gatling, Maven
Cloud & DevOps	AWS, PCF, OpenShift, Jenkins, GitHub, Bitbucket, CI/CD Pipelines, SonarQube, Kibana, AppDynamics, Instana, Datadog
Databases	PostgreSQL, Oracle, MySQL, Microsoft SQL Server
Methodologies	Agile/Scrum, TDD, Clean Architecture, SDLC, Code Reviews, Performance Testing, Test Automation

PROFESSIONAL EXPERIENCE

Capgemini – Discover Financial Services | Team Lead / Senior Java Developer | Oct 2018 – Present | Pune, India

Tech: Java 8/11/17/25, Spring Boot, Spring, Microservices, REST APIs, JPA/Hibernate, Kafka, PCF, OpenShift, Jenkins, Gatling, JUnit, Mockito, Serenity Cucumber, Datadog, Kibana

- Led modernization of the Enterprise Interactive Collections Environment by migrating legacy DAP and JDBC integration into Spring Boot microservices, improving maintainability, release independence, and cloud readiness for a critical collections and recovery platform.
- Optimized API and data-access performance by up to 40% through Hibernate/JPA tuning, SQL review, reusable utility components, database query result caching-ready design patterns, and centralized exception/error-handling frameworks.
- Implemented performance testing with Gatling for high-risk payment and collections workflows, enabling earlier detection of throughput, latency, and concurrency bottlenecks before production releases.
- Engineered REST-based payment, hardship program, bankruptcy, deceased, attorney, and loan-servicing capabilities by designing request/response contracts, business logic, integration flows, and automated unit/integration tests.
- Mentored developers and SDETs through code reviews, TDD practices, SonarQube quality checks, Jenkins pipeline updates, sprint planning, and client-facing technical walkthroughs, improving delivery predictability and code quality.

Capgemini – TransUnion | Java Developer | Mar 2018 – Sep 2018 | Chennai, India

Tech: Java, Spring Batch, Spring JDBC, PostgreSQL, Maven, JUnit

- Engineered a Spring Batch ETL job to ingest, validate, transform, and load CSV files from an FTP source every 30 minutes, reducing manual data-processing effort and improving operational consistency.
- Improved batch throughput by approximately 35% by creating targeted database indexes, tuning SQL access patterns, and applying efficient reader-processor-writer design principles.

- Delivered end-to-end client-facing development independently, including requirement analysis, implementation, JUnit coverage, code review walkthroughs, and production-readiness support.
- Designed failure-safe file handling to rename and archive processed FTP files, improving auditability and reducing duplicate-processing risk.

Capgemini – TransUnion | Java Developer | May 2017 – Feb 2018 | Chennai, India

Tech: Java, Spring MVC, Spring JDBC, PostgreSQL, Maven, Apache Tomcat, JUnit

- Built employee lifecycle and Micro Finance Information modules using Spring MVC, enabling centralized tracking of employee records, promotions, resignations, and project availability.
- Reduced administrative effort by enabling structured Excel-based data upload workflows and database-backed validation for employee information management.
- Developed controller, service, model, and DAO layers with PostgreSQL persistence, improving maintainability and ensuring clean separation of concerns.
- Partnered with client managers to review code changes, refine requirements, and deliver sprint-aligned functionality with unit and integration test coverage.

Capgemini – Global Payments / OpenEdge | Java Developer | Jun 2016 – Apr 2017 | Chennai, India

Tech: Java, Spring Scheduler, Hibernate, SQL Server, Salesforce SOQL, OAuth REST Template

- Automated merchant onboarding and payment terminal provisioning by developing Spring Scheduler jobs that integrated Salesforce, SFTP/XML feeds, SQL Server, and Edge platform REST services.
- Reduced manual boarding effort by approximately 70% by extracting, converting, validating, and updating merchant Processing Account data through scheduled integration workflows.
- Implemented OAuth-secured REST communication between Java services and .NET-based Edge platform APIs, improving reliability of chain, location, and account creation processes.
- Created design documentation, analyzed user stories, incorporated peer review feedback, and delivered product-owner demos to improve transparency and stakeholder confidence.

Prosoft Solutions | Java Developer / Junior Java Developer | Sep 2013 – May 2016 | Pune, India

Tech: Java, Spring MVC, Spring JDBC, MySQL, Maven, Apache Tomcat, JUnit

Projects: ERP – Billing Software, E-Learning Product – Student Information Management

- Delivered Spring MVC-based modules across ERP billing and e-learning products, covering customer contracts, invoices, payment history, accounting entries, and student information workflows.
- Developed controller, service, model, and DAO layers using Spring JDBC and MySQL, improving maintainability through reusable coding patterns and clear separation of concerns.
- Converted business requirements and HTML wireframes into tested application features, supporting stable releases, faster stakeholder validation, and improved user adoption.
- Performed unit testing, SQL development, Tomcat deployments, and peer-review updates while consistently delivering features within planned timelines.

EDUCATION & CERTIFICATIONS

- Bachelor of Engineering in Information Technology – Solapur University, Maharashtra | 2011
- Certifications: Claude 101

TRAINING & KNOWLEDGE SHARING

Conducted internal training on Spring Core/JDBC/MVC, Java 8 features, Collections, Multithreading, and development best practices.
